The Extrusion Press Maintenance Manual

Introduction, Acknowledgments, and References

Useful Tables:

Conversion of Units.....	vii
Temperature Conversion	ix
Calculating Stretcher Capacity – English Units	x
Calculating Stretcher Capacity – Metric Units	xi
Weight of Extrusion Billets	xii
Press Specific Pressure – English Units.....	xiii
Press Specific Pressure – Metric Units.....	xiv
Millimeter Conversion.....	xv
Time Limits for Tooling in Oven at Temperature	xvi
Thermocouple Types	xvi
Glossary of Terms for Press Components.....	xvii
Diagrams of Press Components	xix

Routine Inspection and Maintenance

Scheduled Maintenance.....	1-1
Mechanical Maintenance	1-4
Lubrication.....	1-8
“Preventive Maintenance Program Recommendations” (The Voice of Experience), by David Turnipseed	1-9
Daily Check Sheet Procedure.....	1-12
Daily Check Sheet (Sample).....	1-16
Press Troubleshooting Chart	1-17
“Extrusion Press Maintenance – A Predictive Approach” (The Voice of Experience) by P. Gopalan Kutty, Gulf Extrusions, Dubai	1-24
Farrel Maintenance Training Course information: Press Installation.....	1-30
Mechanical Functions of an Extrusion Press.....	1-36
Mechanical Maintenance	1-39
Correct Bolting Procedures.....	1-45

Press Alignment.....

Press Alignment and Its Impact on Extrusion Performance, from a webinar by Richard Dickson, Hydro Aluminum, and Chris Jowett, Rio Tinto Aluminum.....	2-3
Alignment Principles.....	2-15
Alignment Procedures Using Traditional Mechanic’s Tools.....	2-16
Use of the Alignment Tool Stack.....	2-24
Quick Checks of Press Alignment.....	2-26
Modifying the Press for Easier Adjustment of Alignment.....	2-28
Laser Tracker Measurement Technology for the Alignment, Correction, Condition Monitoring, and Refurbishment of Extrusion Presses, from Joseph Mulder.....	2-30

Tooling

Fixed Dummy Blocks.....	3-1
Design.....	3-3
Interaction with the Container.....	3-5
Preheating the Dummy Block.....	3-8
Failure	3-9
Maintenance	3-10
Repairing the Dummy Block.....	3-11

Method of Attachment to the Ram Stem	3-12
Clean-out Blocks.....	3-13
Stem	3-15
Butt Shear Blades.....	3-20
Container and Container Liner	3-22
“Extrusion Container Care and Maintenance,” by James M. Pope, Special Project Consultant to Lake Park Tool.....	3-26
Container Life and Relining Frequency	3-29
Recent Improvements in Container Design.....	3-31
Development of a Thermally Stable Container.....	3-33
Comparison of Different Container Designs	3-34
Effect of Container on Billet Skin Flow	3-35
“Material Selection for Extrusion Containers,” by Yahya Mahmoodkhani and Paul Robbins, Castool Tooling Systems	3-37
“Material Selection for Extrusion Tooling,” by Yahya Mahmoodkhani and Paul Robbins, Castool Tooling Systems	3-44
“Use of Premium Steels for Extrusion Tooling,” by Werner Hahnel, Kind & Co.....	3-49
“Preventive Maintenance of Extrusion Tooling,” by Gary Dion, Extrusion Consultant	3-53
Minimizing the Occurrence of Flared Billets	3-58
“Press Tool Lubrication Systems,” by James Dyla, Amcol Corp.....	3-61
Inspecting and Repairing Major Components	4-1
Procedure for Repairing Cracked Main Cylinder	4-14
How Major Components are Designed and Tested.....	4-16
Analysis of Failure of a Container Shifting Cylinder Rod	4-18
Improving the Design of Major Press Components, by Ben Demar	4-21
“Adapting Extrusion Presses for a High Cycle Fatigue Load Environment,” by J.O. Nøkleby, Det Norske Veritas	4-25
In-Service Inspection, Repair, and Trouble-Shooting.....	4-28
Failed Components – Repair or Replace?	4-30
Requirements for Replacement Components	4-31
“Catastrophic Failure: A 48 Hour Remedy,” by Rick Colden and Adam Cramlet, Alexandria Extrusion	4-34
Additional Recommendations for Successful Component Replacement	4-39
Hydraulic Equipment	5-1
Hydraulic Oil.....	5-1
Filtration	5-5
Temperature.....	5-5
Sampling & Analysis	5-6
Air Breather	5-6
Pumps	5-6
Valves.....	5-8
Piping	5-8
Pressure Gauges	5-9
System Documentation	5-9
Recommendations for Hydraulic Maintenance from presentations by Jeff Grube and Michael Kramer, Rexroth, at AEC Workshops.....	5-11
Oil Sampling Procedures	5-17
Troubleshooting	5-24
“Proper System Maintenance to Avoid Contamination and Cavitation,” by Jack Hayes, Oilgear	5-28
Farrel Maintenance Training Course information:	
Hydraulic Maintenance	5-35
Right and Wrong Ways to Install Hydraulic Tubing and Fittings.....	5-38
Troubleshooting Hydraulic Problems.....	5-40
Glossary of Hydraulic Terms.....	5-44

ISO/CETOP Hydraulic Symbols.....	5-48
Oilgear Training Bulletins:	
Hydraulic System Survival Techniques #90012	5-51
Filtration Recommendations #90007-D	5-55
Piping Information #90011-F.....	5-63
Resistance of Valves and Fittings to Flow of Fluids	5-67
Storage Recommendations #90006B.....	5-68
Electrical & Controls.....	6-1
Maintenance of Control Equipment.....	6-4
Container Heating	6-7
Electric Motors	6-7
<i>“Extrusion Press Electrical Systems,”</i> by David Turnipseed.....	6-11
<i>“Tips for Successful Electrical Trouble Shooting of Extrusion Equipment,”</i> by David Turnipseed	6-16
“E-Stop” Emergency Stop Buttons.....	6-18
Grounding	6-19
Troubleshooting & Documentation.....	6-20
Billet & Log Infeed Systems	
Billet/Log Infeed Conveyors	7-1
Billet/Log Heaters - Gas Fired.....	7-4
Refractory and Insulation	7-5
Thermocouple Probes.....	7-5
Combustion Systems	7-10
Billet Heaters - Induction	7-29
Log Shear.....	7-31
Log Saw	7-33
Billet Transfer Conveyor.....	7-34
Billet Lubrication	7-35
Profile Handling Systems	
High Temperature Textile Materials.....	8-3
Lead-out Tables	8-5
Run-Out Conveyors	8-6
Water Quench Systems	8-10
Air Quench Systems	8-12
Saws and Shears for Hot Profile Cut-Off	8-14
Pullers	8-19
Profile Transfer Systems and Lift-Overs	8-23
Cooling Tables:	
Walking Beams	8-23
Belt Conveyors.....	8-25
Stretchers.....	8-30
Saw Feed Conveyors.....	8-33
Finish or Cold Saws	8-35
<i>“Aluminum Extrusion Saw Blade Lubrication,”</i> by James Dyla, Amcol Corp.....	8-38
Saw Length Gauges.....	8-43
Off-Load Conveyors.....	8-45
Profile Stackers	8-46
Age Ovens.....	9-1
Heat Treated – “T” Tempers	9-1
Temperature Surveys.....	9-3
Alternative Age Oven Configurations.....	9-5
Combustion Systems	9-8
Routine Combustion System Maintenance.....	9-21

Improving Age Oven Energy Efficiency	9-23
"The Ageing Process for Extruded Aluminum Profiles," paper by Al Kennedy.....	9-24
Die Ovens	10-1
Temperature Uniformity	10-4
Maintenance.....	10-7
Maintenance Schedules	A-1
When to Perform Extrusion Plant Maintenance.....	A-2
Master Maintenance Schedule	A-7
Daily Maintenance.....	A-19
Weekly Maintenance.....	A-22
Monthly Maintenance.....	A-24
Quarterly Maintenance.....	A-28
Six Months Maintenance.....	A-29
Annual Maintenance	A-30
Spare Parts	
Recommended Spare Parts.....	B-1
Storage of Spare Parts.....	B-12
Modernizing Older Presses	C-1
Specifying and Purchasing a New Press	C-7
Upgrading the Press Hydraulic System, <i>Recommendations from a presentation by Michael Kramer, Rexroth, at AEC Workshop, 2023</i>	C-11
Modernizing the Press Feed Line	C-21
Modernizing the Handling System	C-25
Downstream Material Handling.....	C-29
Auxiliary Equipment	C-29
Complete Extrusion Press Rebuilds	C-31
Vendor Request form for Press Upgrades.....	C-34
Double-Length Run-out Systems.....	C-36
Safety & Environment	D-1
Extrusion Tooling Safety	D-3
Safe Lifting Techniques.....	D-6
Mechanical Press Equipment	D-7
Keeping Overhead Cranes Safe	D-8
Check List of Safety Hazards.....	D-10
Personal Protective Equipment.....	D-13
Lock-Out Tag-out Procedures.....	D-15
Environment	D-21
Managing Extrusion Plant Maintenance	E-1
Planning and Scheduling	E-3
Spare Parts Inventory	E-8
Equipment Information Files and History	E-9
Maintenance Engineering – Continuous Improvement.....	E-11
